YORKTEL IT SECURITY SOLUTIONS & SERVICES

Azure Virtual Desktop

For Mergers & Acquisitions

Azure Virtual Desktop (AVD) streamlines the integration process and provides flexibility, scalability, enhanced security features, and cost benefits during mergers and acquisitions.

With AVD, organizations can consolidate their IT environments, ensuring seamless access to applications and a smooth transition for all employees involved.

Mergers and Acquisitions, simplified

with Yorktel's Azure Virtual Desktop Solutions and Services.

Integrate Rapidly

Enable quick integration of IT systems and infrastructure during mergers or acquisitions, with a centralized platform for accessing virtualized Windows desktops.

Centralize Management & Control

Rest easy with a centralized management portal for efficiently deploying, updating and managing virtual desktops, applications, and user access.

Simplify Application Access

Provide a centralized platform to host and access applications, regardless of device or underlying operating system.

Enhance Security

Ensure confidentiality and compliance by offering robust security features like multi-factor authentication, network isolation, and data encryption.

Scale with Ease

Enjoy scalable infrastructure for accommodating changes in user demand - scale up or down as needed.

Optimize Costs

Reduce costs by consolidating desktop infrastructure and optimizing resource usage with a pay-as-you-go model.

Let's **reimagine device management,** together.

Azure Virtual Desktop represents an invaluable tool for those seeking to streamline operations and maximize efficiency.
