

Cybersecurity playbook

for Microsoft 365 Business Premium

Defend your business against advanced cyberthreats

Let us begin by saying that you have made a wise choice in adopting Microsoft 365 Business Premium. No other tool compares to Microsoft 365 Business Premium for keeping your organization safe from cybercriminals.

Now, more about you . . .

Your business has placed their trust in you to shore up defenses and to coach team members through cybersecurity safety. As admin, you are your organization's first and best defense against hackers - from the average malevolent hacker to sophisticated cybercriminal organizations and even nation states.

Your success depends on completing the assigned missions ahead. Let's get started.

Fortify your environment

Sign in and set up

For this first mission, you set up the initial environment for your organization.

Train your team

Secure personal devices

Every device is a possible attack avenue. In this critical mission, you set up protection for every device.

Protect all email

As you know, emails are full of malicious attacks cloaked as harmless messages. This mission adds protection for all email.

Collaborate and share securely

This mission is to ensure your organization uses your newly secured collaboration spaces instead of other, unsecure apps.

Safeguard managed devices

Secure managed devices

With the previous missions complete, you can now take time to add extra protection to devices.
