

APPLICATION PORTFOLIO MODERNIZATION: AUTOMATED 7- DAY ASSESSMENT

Gold Datacenter
Gold Data Analytics
Gold Cloud Platform
Gold DevOps
Gold Application Development

ASSESSMENT FOR EFFECTIVE CLOUD TRANSFORMATION

KEY CHALLENGES OBSERVED

- Lack of defined migration strategy
- Small correlation between efforts and business impact
- Understanding roadblocks
- Inadequate cloud expertise

EASY STEPS TO MAKE A REVIEW SUCCESSFUL

- 1 Introducing the SoftServe modernization assessment approach
- 2 Defining applications for modernization
- 3 Interviewing sessions with business and technical stakeholders
- 4 Automating source-code analysis
- 5 Presenting results with recommendations and defining the next steps

ABOUT THE ASSESSMENT

7-Day Application Portfolio Automated Assessment is designed to evaluate cloud compatibility and readiness, identify roadblocks, and recommend an effective cloud migration strategy. Our expertise is combined with world-class tools to help you assess the application portfolio. This enables controlling costs, priorities, and roadblocks on your journey to the cloud.

Automated code analysis allows us to assess an application portfolio with up to 20 applications in a fraction of the time of expensive manual assessments.

IN 7-DAYS, YOU WILL GAIN

- Current technical inventory report with the state of applications and their technical debts and modernization roadblocks
- High-level cloud modernization strategy aligned with your business goals and business impact
- High-level implementation roadmap
- Clear comprehension of efforts, timeline, and TCO
