Azure

Modernize your applications with confidence and proven methods

Azure Application Modernization:

We are a Microsoft specialized company with continent-wide presence focusing on delivering Microsoft Cloud Services to our customers, which vary from government, health-care, financial and banking, retail, telecom, and more.

See what customers are saying:

"We have increased agility, scalability, stability and patching automation, which helps us to minimize manual effort. The most significant benefit, however, is to be able to better serve our business and end customers, which is the main reason for this change and direction."

– Melinda Lloyd, IT Program and Project Manager, Digicel Group

WHAT WE OFFER

MDS Azure Application Modernization is focused on analyzing and evaluating the current state of your applications in order to gain greater agility and scale with built-in security and high availability powered by Azure Cloud Services.

We follow Microsoft's best practices, adhering to the Cloud Adoption Framework and Well-Architected Framework through-out the whole process.

MDS works using cloud-native architectures powered by Microsoft Azure microservices, managed databases, AI, DevOps support, and built-in monitoring.

We use a variety of Microsoft tools and solutions like Azure Migrate, Movere and Cloud Pilot to analyze the source environment and migrate in the fastest, safest way possible, keeping security always in mind and designing resilient and protected architectures.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
